

VASARI INSTALLATION GUIDE

Vasari is a hand-made porcelain tile collection. Due to the nature of the product, it will vary in size, thickness and colour

Imperfections are inherent, and this is considered a feature of hand-made material

The manufacturer recommends laying Vasari with a 3mm grout joint to allow for irregularities in size. If this tile is being laid on a floor, it will be uneven and not flat – please consider this prior to installation

It is recommended that tiles are picked from different boxes when laying, to ensure a natural look

If Vasari is being exposed to oils, it is recommended that you seal the tile after installation with Aqua Mix Sealers Choice Gold – Rapid cure. It is also recommended you seal the tile if it is installed in a shower wall or areas where it is exposed to water.

Hand Made in Spain
