INSTALLATION

These tiles can be installed on any type of interior walls including shower walls, steam showers, etc. but special care is necessary to maintain the properties of the product.

In order to obtain the maximum WOW effect, use 1,5 mm - 0.06 in spacers between the tiles to maintain an even installation over the whole surface.

We recommend that pieces be handled with care during installation in order to avoid scratching.

Tiles must be cutted using a water-cooled disc cutter.

Tiles can be installed using a regular adhesive for ceramic tiles, but care should be taken to prevent excess adhesive from drying and adherings to the surface of pieces. For cleaning excess installation materials before they have dried, use a sponge and plenty of water.

MAINTENANCE

Metal tiles scratch easily, so we recommend using a soft cloth moistened with water and neutral soap. Never use acidic detergents or abrasive cleaning products or elements that can cause irreversible damage to the product.
