
MATTONCINO

CONCAVE COLLECTION

INSTALLATION GUIDE

Mattoncino is made from reclaimed bricks. These bricks are sourced, and then manufactured into beautiful mosaics

Due to the nature of the material, no two sheets are the same. It is also normal to have considerable variation in colour, thickness, and texture, within the sheet and between sheets

This is the beauty of this product

Prior to laying, we recommend you blend sheets from various boxes – this is normal practice when laying any tiles, however with this product it is definitely recommended.

To the right you will see some examples of “extreme” variation, which you may find in your batch.

Pre and post sealing is also required
