

Zelij Collection

About Zelij

Zelij has been inspired by traditional Moroccan zellige, and therefore intentionally manufactured with the following characteristics

- Edge & surface irregularities
- Chips & imperfections in the glaze
- Variation in size, colour & thickness

Note not all shade variations within a colour will be seen on display, however the tone of the colour variations is always aligned to the intended shade.

Installation notes

Due to the high variation in shades within a colour, we advise you to ensure tiles are well blended prior to installation. They can be dry-laid and/or selected randomly from multiple boxes to create a natural mix. Speak to your tiler prior to installation

Grout joints are required when laying Zelij, however due to the subtle variations in size, joint widths may differ between pieces

Zelij is a white body ceramic tile, and suitable for wall only applications. Zelij is not pool safe.

To protect the glaze, always use a PH neutral cleaner and avoid using abrasive products

Keep tiles dry and away from moisture prior to installation
